Silage SAVOR® brand Dry Flowable Preservative

DESCRIPTION

A dry, flowable preservative for use in applicators. It assists in reducing the time normally needed for the fermentation process. Fewer nutrients are lost and silage quality is improved.

INGREDIENTS

Propionic Acid, Calcium Carbonate, Amorphous Silicon Dioxide, Ammonia Hydroxide, Lactic Acid, Water, Isopropyl Alcohol, Disodium EDTA, Benzoic Acid, Propyl Gallate, Methylparaben, Propylparaben, Sorbic Acid, and Natural and Artificial Flavors.

DIRECTIONS

For use with Gandy® brand or other dry applicators. Calibrate according to manufacturer's instructions.

ENSILE ONLY AT RECOMMENDED MOISTURE LEVELS

| | <u>Moisture</u> | <u>Lb/Ton</u> <u>Minimum Application</u> |
|--|-----------------|---|
| Alfalfa and Other Legumes (Ensiled)..... | 50 - 65% | 1 |
| Grass (Ensiled) | 60 - 70% | 1 |
| Corn Silage | 60 - 65% | 1 |
| Oatlage, Other Small Grain Silage | 55 - 70% | 1 |
| High Moisture Grains (Ensiled) | | |
| (Ground Shelled)..... | 26 - 32% | 2 - 4 |
| Baled Silage or Balage | 55 - 65% | 1 |
| Bunk Life Extension | | 2 |

Apply Top SAVOR® brand Liquid Preservative to stop top layer spoilage.

STORAGE

Store in a cool dry place. Keep container closed when not in use.
